

What does the NBV in the integration ressort create generally - and furthermore?

With the integration ressort the NBV dedicates itself a subject of great social relevance. The organization committes itself since there are increased numbers of refugees coming to Germany, this about mid off he year 2015. With concentrating staff resources towards non-voluntary by end of 2017 even more. The integration actions NBV implemented since, does not follow by fortune, but a widespreading plan.

The consulting and supporting progamme provides sports clubs with plenty of needs for integration tasks: Intercultural qualification and support by an adequate sourcing assistance. This enables sports clubs troughout the entire federal state in the position to help people with migration background, refugees and other with social needs to offer spefecic choices of sports programmes that often reach far further than the pure exercise courses or training groups.

The very welcome newcomers are supported by progesses with the public authorities, homework, account opening and applications plus search for apartments and jobs. The realisation in a group is much easier, therefore very important networks with social facilities and citizens offices are generated. These are steadily attended and developed This grown up network of actors and initiatives is small mashed just as diverse. Simple formular? Not at all – there are always new situations to adjust to. Various and exciting!

To whom do we like to adress our offers?

For about one quarter of Germany´s population is born in an other country or at least one parent is immigrated. By definition these people therefore have a so-called migration background. Besides the individual attribution this awkward term concludes it also stands for the cultural vatiety of a population concerning place of birth, language or cultural imprint of its members. In sports clubs it´s ammittedly distinct very different: Mainly girls, women and older people with migration background have a far fewer apperance or rather membership than those without. Refugees are not that much respresented in clubs either. To approach these persons special is one of the main tasks of integration work inside the professional association.

Who benefits from our actions and commitments?

Numbers of people with migration background are increasing – not just in the last few years. With this fact the challenges for living together in a linguistical and cultural varied population are growing. But integration doesn´t mean an effort on it´s own, on the same side it´s a chance to find answers to future tasks in a steady changing and developing world – we all together! That´s effective on clubs, that can generate the secondary growth and volunteer function owners just as the society that gets cultural and creative new imput.

- Carving out the corporate meaning of „integration“ potential to fix the subject in organized sports even deeper seated.
